

# IMAGE OF CHINA IN CZECH WEEKLIES

x The analysis was not performed in the specific year (the medium was not established, perished or did not meet the criteria for analysis).

The analysis covered weeklies with economic or political content which were most read in the period 2010-2017. Týden weekly meets the criteria, Instinkt weekly did not. Both weeklies were put into the separate category as a control sample since they had a Chinese owner.
